In a subject that has for so long been the source of disagreements one can scarcely hope to produce a work that will commend itself to every critic, or to bridge in any degree the chasm that already yawns between the two leading schools of interpretation; and I must own frankly, at once, that I belong to the school that sees in the later work of Plato a fuller development and elaboration of the ideal scheme which was at first but vaguely sketched. It is not the spirit of controversy, however, but the hope for a better understanding of this position on the part of other controversialists, that has led me to publish these papers. In preparing them I have not neglected to make myself acquainted with the position taken by other schools; but that I am chiefly indebted to the Platonic scholars of Cambridge cannot be denied.
