

An Essay on the Application of Mathematical Analysis to the Theories of Electricity and Magnetism

By George Green

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.6in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1828 Excerpt: . . . on the surface in question. Suppose now, all the interior bodies to reduce themselves to a single point P, in which a unit of electricity is concentrated, and f to be the distance Pp: the potential function arising from P will be $\frac{1}{f}$, and hence BL. f r being, as before, the distance between p and the centre O of the shell. Let now b represent the distance OP, and e the angle POp, then will $\frac{1}{f^2} = \frac{1}{b^2} \cos^2 e$ or. From which equation we deduce successively, $df = -\frac{db}{b^2} \cos^2 e$ or $df = -\frac{db}{b^2} \cos^2 e$. Making ra in this, and in the value of B before given, in order to obtain those which belong to the surface, there results This substituted in the general equation written above, there arises $\frac{1}{r^2} = \frac{1}{b^2} \cos^2 e$ If P is supposed to approach infinitely near to the surface, so that Ja--; being...

Reviews

I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.

-- **Merritt Kilback II**

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
