Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Geometrical Researches on the Theory of Parallels Lobachevski was the first man ever to publish a non-Euclidean geometry. Of the immortal essay now first appearing in English Gauss said, The author has treated the matter with a master-hand and in the true geometer s spirit. I think I ought to call your attention to this book, whose perusal can not fail to give you the most vivid pleasure. Clifford says, It is quite simple, merely Euclid without the vicious assumption, but the way things come out of one another is quite lovely. \*\*\* What Vesalius was to Galen, what Copernicus was to Ptolemy, that was Lobachevski to Euclid. Says Sylvester, In Quaternions the example has been given of Algebra released from the yoke of the commutative principle of multiplication - an emancipation somewhat akin to Lobachevski s of Geometry from Euclid s noted empirical axiom. Cayley says, It is well known that Euclid s twelfth axiom, even in Playfair s form of it, has been considered as needing demonstration; and that Lobachevski constructed a perfectly consistent theory, wherein this axiom was assumed not to hold good, or say a system of non-Euclidean plane geometry. There is a like system of non-Euclidean solid geometry. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
