Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Tuberculosis Hospital and Sanatorium Construction: Written for the National Association for the Study and Prevention of Tuberculosis The present work is an expansion of the pamphlet issued two years ago by the National Association for the Study and Prevention of Tuberculosis in response to a pressing demand for information and advice in the establishment of sanatoria and hospitals. During this period the emphasis of the campaign has been laid particularly upon the importance of increasing our equipment for the institutional care of tuberculous patients. The response has exceeded expectation and has been particularly encouraging in the degree to which local and state governments have accepted responsibility for the situation. Under these conditions the problem of tuberculosis from the institutional point of view is to care for the largest possible number of patients at the lowest possible cost compatible with efficient results. While it is true that institutional expense is much more a matter of maintenance than of original cost of construction it is equally true that careful preliminary planning is the chief factor in subsequent economy of operation. It is with this end in view that the following study has been prepared. It is hoped that the book will prove of service to those charged with the responsibility of dealing with the institutional problem in their several communities.
