Excerpt: .cases of unknown origin to those of known artificial origin. Further, it does away with all need for a motive and with the incredulity which cannot believe selfmutilation possible. A brief study of somnambulism and suggestion will demonstrate the truth of these statements. Somnambulism may be defined as that hysterical state in which an idea or a feeling takes on an exaggerated growth which the patient is powerless to check. Because of this unchecked growth, outside the control of the will, that one idea acquires such importance that it finally completely dominates the patient. This is known as somnambulism. During this period of the somnambulist state all functions are suppressed except those directly concerned in the dominating idea. Although the other functions still exist, they are beyond the control of the patient s will. The dominating idea disassociates itself from them and develops outside...
