Congress established the Federal Depository Library Program (FDLP) to provide free public access to federal government information. The program's origins date to 1813; the current structure of the program was established in 1962 and is overseen by the Government Printing Office (GPO). Access to government information is provided through a network of depository libraries across the United States. In the past half-century, information creation, distribution, retention, and preservation has expanded from a tangible, paper-based process to include digital processes managed largely through computerized information technologies. The transition to digital information raises a number of issues of possible interest to Congress. This report discusses those possible concerns as they affect FDLP. These issues, which are in some cases interrelated, may not only affect FDLP, but also extend beyond the program to a variety of contexts related to the management of government information in tangible and digital forms. Issues include the following: maintenance and availability of the FDLP tangible collection; retention and preservation of digital information; access to FDLP resources; authenticity and accuracy of digital material; robustness of the FDLP Electronic Collection; and...
