Carrington Bolton, Ph. D., Professor of Chemitttry in Trinity College, Hartford. GENERAL AND PHYSICAL. Nature and Origin of the Elements.--Mr. William Crookes, F. R. S., president of tbe chemical section of the British Association for the Advancement of Science, gave an address at the Birmingham meeting in September, in which he undertook with great skill aud learning to adapt the doctrine of evolution to the chemical elements. After glancing at the difficulty of defining an element he noticed the revolt of many physicists aud chemists against the ordinary acceptance of the term. He next considered the improbability of their eternal self-existence or their origination by chance. He suggested as a remaiuiug alternative their origin by a process of evolution, like that of the heavenly bodies according to Laplace. In this connection he remarks: This building up or evolution is above all things not fortuitous; the variation and development which we recognize in the universe run along certain fixed lines, which have been preconceived and foreordained. To the careless and hasty eye design and evolution seem antagonistic; the more careful inquirer sees that evolution, steadily proceeding along an ascending scale of excellence, is the strongest argument in favor of a preconceived plan. Mr. Crookes then shows that in the general array of the elements, as known, a striking approximation is seen to that of the organic world, though he admits this apparent analogy must not be strained. He then...
