

Everyday Abstract Conditional Reasoning: In Light of a 2,400 Year-Old Mistake in Logic

Filesize: 1.48 MB

Reviews

An extremely wonderful publication with lucid and perfect reasons. It typically will not expense too much. You are going to like the way the blogger compose this publication.

(Prof. Maya Hand)

EVERYDAY ABSTRACT CONDITIONAL REASONING: IN LIGHT OF A 2,400 YEAR-OLD MISTAKE IN LOGIC

Pellea Human Kutato Es Fejlesztő BT., United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Why has logic been fundamentally mistaken for 2,400 years? How can modern psychology help logic overcome its imperfections? How does all this provide an immediate response to several century old philosophical dilemmas? Why are people, who are stigmatized as being illogical, biased and irrational in the literature, in fact logical and rational, and why is it the literature that incriminates itself with the accusation? You can find out all these and more by reading this book. Have a look inside! Here is a more technical description: The interpretation of the if P then Q conditional statement is a central element in most logical systems. It largely shapes how these logical systems function. It is well known that, although attempts have been made, logical systems are principally unable to encapsulate how people reason in everyday life. This is mainly due to the discrepancies between the logical abstractions of the conditional statement and its everyday interpretation. Among other things, this makes it difficult to design artificial intelligence based on the abstract rules of logic. However, the ancient logicians who first defined the traditional interpretation of the conditional erroneously took into account more propositions than were actually being denoted. They characterised the if P (or R) then Q relationship in place of the if P then Q relationship. In relation to this, they also committed the error of leaving the context undenoted, which led to an unnatural interpretation of logical truth and logical necessity. This mistaken interpretation is still predominant today and can also be found in several mathematical logics, such as in propositional logic, even though mathematical logics were allegedly created independently of the ancient...
