

Jatropha curcas: A potential genetic resource for herbal medicine and liquid bio-fuel

By Akhilesh Kumar

GRIN Verlag GmbH Dez 2014, 2014. Taschenbuch. Book Condition: Neu. 211x17x3 mm. Neuware - Scientific Essay from the year 2014 in the subject Biology - Botany, , language: English, abstract: *Jatropha curcas* L. (Euphorbiaceae) is a multipurpose perennial shrub/small tree, native to Mexico and Subtropical America, now grows naturally in most tropical areas of the world. It is an underutilized plant of multiple values. It is cultivated for seeds, having liquid biofuel potential and as live fence for the protection of agricultural crops. Various parts of the *J. curcas* are globally used for healthcare management of plants, human being and domesticated animals. Besides ethnomedicinal usages, this species has much other ethnobotanical, economic and ecological importance. Present book deals with origin and distribution, taxonomic description, propagation and cultivation, utilization, pharmacological activities, phytochemical properties and future prospective of this species. 28 pp. Englisch.
